HD_x THERAPY

ENABLED BY THE THERANOVA DIALYZER

The THERANOVA dialyzer, featuring an innovative membrane, effectively targets large middle molecules not efficiently removed by currently available dialysis treatments. It provides the opportunity for an expanded hemodialysis therapy, HD_x, providing HDF performance and beyond in the removal of middle and larger middle molecules, using regular HD infrastructure.

Do not use THERANOVA dialyzers for HDF or HF due to higher permeability of larger molecular weight proteins such as albumin.

HDF

PERFORMANCE
AND BEYOND...

- Equivalent removal of small and conventional middle molecules
- Greater removal is possible for large middle molecules
- Applicable to all HD patients

AS SIMPLE AS HD

- HD infrastructure: no need for HDF capable monitors and specific water quality and fluid-quality assurance measures¹
- Avoiding HDF additional running costs: no disposable infusion line, fewer ultrafilters, less dialysis water and less concentrate
- Avoiding requirement for specialist training and extensive monitoring during therapy delivery²

XI IAHN CONGRESS

GREETING

Dear Colleagues,

Welcome to Larissa and the XIth IAHN Congress. Over the last ten years, the Association has held 10 very successful Congresses and has published their proceedings in illustrious Journals. This was achieved by the continuous efforts of the past IAHN Presidents and the Presidents of the consequent Congresses. We hope that the current Congress will follow in the same lines. We have on our side two factors.

The first is the location. Larissa is in the centre of Greece and in its most fertile region. It has a rich History. Mount Olympus, the seat of the twelve Olympian Gods is at a stone's throw distance. The same stands true for the mount of Pelion, where in its forests Chiron the Centaur, the half horse-half man teacher of Asclepius lived. And in Larissa's periphery Asclepius was born and Hippocrates died. In early modern times, the area was the cradle of the Greek Enlightenment in the 18th/19th centuries. One of its representatives, Pyros the Thessalian, the clergyman/doctor and inventor, was strongly attached to this land. Now, the Medical School of the University of Thessaly is an active hub for teaching, research and clinical practice.

The second is the enthusiastic support to our work in the Organising and Scientific Committee by all the IAHN Members and several non- members. We warmly thank all of you who came from close by and far away, from Greece, Turkey, the European Union, North Africa, the Middle East, Australia, China, the States, Mexico with the aim to discuss and promote the subject of our love, the History of Nephrology. And last but not least to meet again old friends and to acquire new ones. We thank you all and wish a fruitful and enjoyable Congress, which includes relevant topics from Early Antiquity till the roots of the very last modern technologies that write the History of tomorrow.

Certificate of Attendance

All registered participants are entitled to receive a Certificate of Attendance. The Certificate will be issued only upon return of the name badge and completion of the Evaluation Form, onsite, by the end of the Congress.

Slide-Presentation Secretariat

The slide-presentation secretariat will be operating during the sessions of the scientific Program in the Exhibition Hall in order to assist speakers/presenting authors and collect all presentations. Presenters are requested to deliver their presentation(s) to the technical secretariat operating, **at least one (1) hour** before the beginning of the Session. If the presentation is scheduled early in the morning, they are kindly requested to check their presentation with the technical secretariat the day before. Presentations will be available in the lecture hall via computer network. There will be no possibility to connect your personal laptop in the lecture hall, due to very restricted timeslots (row of the presentations).

XI IAHN CONGRESS

GENERAL INFORMATION

*To the attention of Mac users:

Please make sure to come with the suitable adapter and to also have a backup PPT for PC or PDF. You are kindly requested to meet with the technical secretariat at **least two (2) hours** before the beginning of the session, in order to assure compatibility (or backup solutions).

Time Slots (applies to Moderators)

As a Moderator, you should ensure the smooth progress of the session, time management as well as encourage discussions and interactions between faculty members and the audience by allowing sufficient time for questions from the audience. For your assistance, a timer will be running on the screen along with the presentation. After a warning (before the last minute of the presentation) the projection will be stopped and you will have to ask from the presenter to conclude.
