

General Information

Location

The **Kalimera Kriti Hotel** is located close to Heraklion, Crete, Greece

www.kalimerakriti.gr

Distance from Heraklion Airport (HER): 42 km

Online Registration has now started!

Registration fees:

On-site participation: € 550

Online (virtual) participation: € 150

Registration fee for **on-site participation** includes access to all educational and networking events, full-board accommodation throughout the duration of the School and ground transportation between Heraklion airport and the Spring School venue; it does not include flight tickets.

Online participants will have virtual access to the plenary sessions and breakout workshops.

Submit your abstract!

Presenters of accepted abstracts will be entitled to a reduced on-site registration fee of € 400. There will be no reduction for online participation fees.

The three best presentations will be granted a Young Investigator Award. Detailed information will be available soon on our website www.eurospringschool.eu

5th Euro Spring School on Pulmonary Circulation and Right Ventricular Function

The Science and Practice of Venous Thromboembolism

22-26 September 2021
Heraklion, Crete, Greece

www.eurospringschool.eu

Welcome

Dear Colleagues and Friends,

Welcome to the website of the 5th Euro Spring School on Venous Thromboembolism.

This major bi-annual international event on the science and practice of venous thromboembolism (VTE) is organized by the Center for Thrombosis and Hemostasis (CTH) at the University Medical Center Mainz, Germany, in collaboration with the Leiden University Medical Center (LUMC), The Netherlands. The Euro Spring School is endorsed by international and European scientific societies and offers CME accreditation.

In view of the COVID-19 pandemic, and in the hope of being able to ensure on-site participation for as many interested clinicians and scientists as possible, the 5th Euro Spring School on VTE will take place in autumn this year, from 22 to 26 September 2021!

VTE is a field in which ongoing research continues to revolutionize clinical practice and improving patient outcomes. Based on the support and the feedback that we received from you in our past Spring Schools, we have taken every care to ensure that the programme of the 5th Euro Spring School 2021 will include the most relevant and contemporary scientific topics related to thrombosis and VTE, while promoting active interactions and scientific networking. The programme will feature:

- State of the Art Clinical Seminars
- Moderated Abstract Presentations with Young Investigator Awards
- Breakout Workshops (parallel interactive practical sessions, from which the participants will be able to choose among a total of 12 offered workshops) in the afternoon sessions
- Hands-On Tutorials
- Lunch and Learn noon sessions, and numerous further networking opportunities.

We very much hope that you will join us for this exciting educational event in September 2021!

With very best wishes

Stavros V. Konstantinides, MD Menno V. Huisman, MD

Faculty

Stefano Barco (CH), Christine Baumgartner (CH), Cecila Becattini (IT), Dorothea Becker (DE), Laurent Bertolotti (FR), Sigrid Braekkan (NO), Elena Campello (IT), Michele D'Alto (IT), George Giannakoulas (GR), Lukas Hobohm (DE), Menno V. Huisman (NL), David Jiménez (ES), Frederikus A. Klok (NL), Stavros Konstantinides (DE/GR), Matija Kozak (SL), Mareike Lankeit (DE), Marcel Levi (UK), Nadine Martin (DE), Lilian Meijboom (NL), Fionnuala Ni Áinle (IE), Nicolas Meneveau (FR), Cathrin Nourse (DE), Piotr Pruszczyk (PL), Marc Righini (CH), Olivier Sanchez (FR), Karin Schreiber (DK), Andrew Sharp (UK), Michael Sproule (UK), Branislav Stefanovic (RS), Cecile Tromeur (FR), Luca Valerio (DE), Eric Vicaut (FR)

CME Accreditation by EBAC

The 5th Euro Spring School on THE SCIENCE AND PRACTICE OF VENOUS THROMBOEMBOLISM will be accredited by the European Board for Accreditation in Cardiology (EBAC).

The following societies have been contacted for endorsing the scientific programme of the Euro Spring School:

Scientific Topics

- Pathophysiology and pathogenesis of VTE
- Immunothrombosis and thromboinflammation
- Cancer-associated thrombosis and VTE
- Links between thrombosis and COVID-19
- Evolution of diagnostic strategies for VTE
- Imaging of the right ventricle and pulmonary circulation
- Right heart catheterization
- Risk-adjusted anticoagulation and interventions
- Treatment of acute and chronic right heart failure
- Role of the laboratory in modern anticoagulation management
- Atypical sites of thrombosis
- Challenges in managing VTE in pregnancy
- Fragile patients, bleeding emergencies
- Optimizing follow-up programmes after PE
- Work-up of patients with persisting dyspnoea or limitation after PE
- Advances in CTEPH treatment
- Challenging clinical cases across the spectrum of thrombosis and VTE management
- Designing, preparing and interpreting academic clinical trials
- Programmes and opportunities for early career support
