

Educational Seminars on Diabetes 2012

3rd Educational Seminar

13-15
January
2012

Divani Caravel
Hotel
Ilissos Hall
Athens

Program

Introduction

The field of Prevention of Cardiovascular Diseases has been advancing in a dizzying pace, making it increasingly hard to follow all developments in the field, especially in matters of specialized training.

These four educational seminars on Prevention of Cardiovascular Diseases, organized by the Institute of Study, Research and Training for Diabetes Mellitus and Metabolic Diseases in collaboration with Cambridge University, are specially designed to cover all advancements in the field of Lipids, Hypertension, Diabetes Mellitus and Atherosclerosis.

The programme offers the unique opportunity to the Greek audience to attend seminars prepared and presented by both Greek and foreign scientists with extended research experience in their respected fields. The learning experience is further enhanced by utilizing the latest e-learning and live streaming technologies and combining them with face-to-face classroom interaction.

The seminars are available for general practitioners as well as specialized internists, diabetologists, cardiologists, family doctors, endocrinologists and doctors of other specialties which apply to the Prevention of Cardiovascular Disease and are aiming to offer a better understanding and provide insight in the latest developments of the pathophysiology diagnosis and treatment of cardiovascular risk factors.

We invite you to participate, actively and effectively, by attending the courses and the online educational material, so that this distribution of knowledge becomes a valuable learning experience for your and your colleagues.
